Moon Bay Condominium Association, Inc. Architectural Standards

Objective to maintain a uniform exterior appearance on all buildings. Whenever possible replacement window and door configurations are to remain as originally constructed. If original configurations are no longer available due to code compliance then the Board of Directors shall designate an approved replacement configuration.

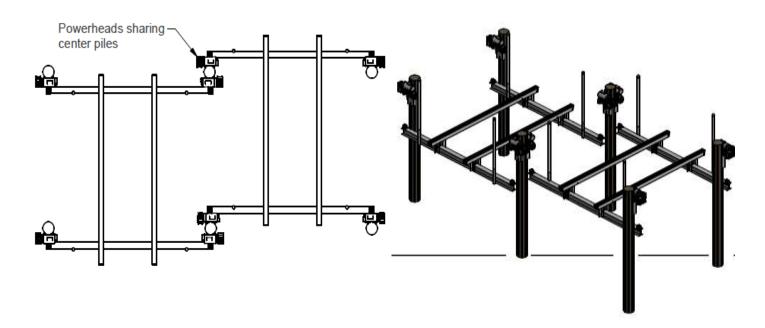

Prior to the commencement of any work, an Architectural Review Form / Application for Modification must be submitted to the Association for review/approval.

General Specifications and Requirements:

- 1. All exterior windows and glass doors shall have bronze aluminum frames.
- 2. All new windows and glass doors will have the approved baseline window tint. The tint color is bronze. (This window tint is from PGT.) This is the only approved tint without providing a sample.
- 3. All replacement windows and glass doors are to be "Hurricane NOA Rated" Large and Small Missile Impact rated and of the same configuration as the original construction.
- 4. Due to the potential for impact from objects at Moon Bay and surrounding areas the association has adopted of the higher missile impact rating (currently required up to 30') on all floors.
- 5. Solid core raised panel fiberglass or impact storm entry doors with approved association paint color permissible.
- 6. Installation of flooring must have approved soundproofing "underlayment" for units in A/B building (except bottom floor level)--State of FL Bldg Dept minimum 50 STC/IIC though 60s recommended. Moreover, balconies and shower walls/floors must have waterproofing/crack prevention before installing any tiles--fore example RedGard Waterproofing/Crack Prevention Membrane.

Boat Lift Minimum Specifications:

- 1. Beamless cradle-lift, 12-16k lbs. capacity with 12" piling within easement between deeded 300sf slips to be able to share lift pilings (Max. Boat LOA 30')--match existing motors & aluminum bunks/layout/specs.
- 2. As per the Association Sponsored December 2015 Cummins-Cederberg Marine Engineering Moon Bay report for a slip with approximate width of 12', the center-to-center distance between 12" pilings estimated at 11'...potential vessel beam up to approximately 10'.
- 3. Must obtain applicable permits comply with county/state & core of engineers and licensed GC requisites
